It must not be reproduced in whole or in part, nor must any proposals or designs indicated hereon be implemented without written permission. Do not scale. Notify the Landscape Architect of any discrepancies. Tree positions subject to foundation depths and service run review by engineer.

A more formal seating area is created in the north west corner around an existing tree. The Breedon gravel surface can be used for seating or outdoor table tennis.

Play equipment is roughly grouped into two clusters. Re organization into one group in a defined arrangement may be a better use of space. The equipment is distributed amongst the trees providing a pleasing setting for play.

The area under the trees at the front of the space is developed with low planting and additional seating. A degree of separation is created with a yew hedge between the play area and the seating area. The hedge is maintained at the optimum height for separation and natural surveillance.

Timber post and rail replaced with a brick wall to match the existing and to contribute to the local building vernacular. The entrance is enhanced with a circular brick paver feature and entrance archway. The access gate provision is retained but constructed with powder coated steel. Double gates allow maintenance access and two pedestrian gates are positioned close to the current positions. The arch is designed to separate to allow tall vehicle access.

NOTE
The proposals are based on an OS masterplan and therefore the trees, play equipment, benches and any other content is indicative only and their positions and detail subject to confirmation at a later stage.

Images are provided as similar examples of proposed park elements and are intended as a reference rather than an exact interpretation.

Interpretation trail.
A series of information boards which graphically explain the history and culture of the Village

The area to the south east of Jubilee Green is separated from the play area with a curved yew hedge maintained at a similar height to the hedge on the west side of the entrance. The area accommodates the flag pole and cross. The heritage, cultural and ceremonial potential is to be developed with a bound gravel surface, seating and improved interpretation of the historical background of the village.
